"Wilson is like **Master Chief** in the game Halo. He lives on the bleeding edge of tech to help others on the front lines. A modern renaissance man who explains things well. So good he **tunes** what others create." -- from among [37 references on LinkedIn](#)

Certifications: [CompTIA Security+](#), [ISTQB Functional & Performance Engineer \(CTFL, CTFL-PT\)](#), ASQ Quality Manager, CQE (Statistics), CQA, [AWS Practitioner](#), Elastic Stack Configuration & Security, [SAFe Agilist](#), Pragmatic Marketing, PMP, [MCP Microsoft Project](#), CPIM, OMG Certified UML Professional. ATT Hackathon at CES 2016, 2015, 2014 winner.

Systems Architect (DevSecOps SRE) at McKinsey&Co

8/19-

Averted production disasters by taking a [deep dive into Docker Registry](#), coded [Bash](#) and [Python](#) (with feature flags) to pare back a 12TB database 65%. Automated upgrade of OS and utilities to latest versions while introducing vulnerability scans (JFrog Xray, Trivy, Anchore, Black Duck, Fortify SAST, WebInspect DAST) invoked from IDEs and [Makefiles](#) in CI/CD pipelines building Java Spring Boot using React, Python, PHP, Ruby, [Go](#).

Strengthen security (as Enterprise admin) by automating [Git signing](#) with use of [Hashicorp Vault](#) and suggesting enhancements with vendors. **Migrated on-premises services to cloud** (AWS, Azure). Automated upgrade of [Ansible](#) and [Helm](#) infrastructure pipelines to include metrics visualized by ElasticStack, Prometheus/Grafana, and Splunk. Designed secure custom **self-service portals** through Okta security and APIs of Enterprise GitHub, Jira, Confluence, Artifactory, and other developer utilities. Integrated team across 3 continents using [pair programming](#), [static code scans](#), [Jira](#), [GitHub code reviews](#), [git hooks](#). Initiated weekly deep dives and skills cert. prep. virtual meetups.

DevSecOps/Cloud Performance Leader at JetBloom

8/14-8/19

Led teams to **achieve shift-left** development Performance Engineering by automating [memory profiling](#) and metrics capture in Git-triggered jobs in [Jenkins automated cloud-based CI/CD](#). Defined proactive use of monitoring and alerts from [Dynatrace](#), AppDynamics, Google Analytics, Elastic (ELK) stack, [New Relic](#). Designed a [perf engineering in the cloud](#) approach that saves money using functional and [security](#) test tools.

Designed roadmaps, timelines, velocity calculations, and process presentations to executives and technical audiences. Used Trello, JIRA, Skype, Zoom, and other collaboration tools. Consistently maintained SCRUM/stand-ups and KanBan as part of [SAFe Agile using CA Agile](#). Initiated on-going Communities of Practice meetups among developers and operations. Collaborated in creating videos and [300+ deep-dive articles](#) written using mark-down for enterprise-level collaboration and training. Crafted and presented step-by-step hands-on [video-augmented](#) tutorials at conferences on [DevSecOps](#), [Git](#), [Shell scripting](#) (building pre-checks and verifications at each step).

Led a team to create tools and tutorials to [restore/load data](#) using [Salesforce DX](#).

Coded [SikuliX Selenium](#) with [OpenCV](#) & [Tesseract OCR](#), [JMeter Java](#), [LoadRunner C & JavaScript](#), [Flood Element Typescript](#). Constructed JAM-stack websites leveraging [APIs](#). Created [DevSecOps](#) pipelines using [Ansible](#), [Packer](#), [Terraform](#), [Docker](#) in [Google Compute](#) and EC2 clouds. Implemented [IoT](#) in [Amazon](#), [Microsoft Azure](#), [Samsung](#), and other clouds. Designed and coded Python for data-handling and use of [SciPy](#) in an [Algorithmia \(Machine Learning\) API](#). Designed and programmed [OAuth2](#) and [JavaScript libraries](#).

Master Developer Advocate/Consultant at HP Software 8/10-7/14

Introduced **Salesforce CRM**. Led teams in China, India, and New Zealand to reduce response time 85%. Assets from the effort are now included in SAP Mobile installers. Improved responsiveness of mobile conference app by 40% by tuning JVM and logging. Led introduction of Shunra mobile network analytics -- a service that performs like Google's PageSpeed in-house -- established all aspects of evangelism, including architecture and development with vendors around the world. This includes creating **videos** and live presentations at meetups and technical deep-dives. Created environments in AWS, Skytap, and other clouds for testing, automated demos, and hands-on courses (with videos).

SRE Performance/Developer with MBO Partners 1/07-8/10

Led international teams to get several enterprise systems into production scalability and stability through debugging, **profiling**, and benchmarking. Implemented and evangelized Agile processes, code reviews, static code analysis, and automation. Integrated third-party APIs, SQL, Java, and .NET C# code. Reduced response time spikes and garbage collection by 62% on an app.

Prior experience to 2007

Managed up to 35 technologists. Consulting experience with an international consultancy (KPMG). Six-sigma consultant. Obtained Top Secret clearance to design and program systems for the Stealth Fighter at Lockheed Skunk Works. Programmed apps using C, C#, Visual Basic, and declarative languages. **Product Manager** of international security product.

Education

M.S., Educational Computing, Pepperdine University
B.S., Economics, Loyola Marymount University
128 courses completed on Pluralsight, LinuxAcademy, ACloud.guru, Coursera, EdX, Udacity, Lynda/LinkedIn, OpenSAP, **QwikLABs**. **Salesforce Trailhead Adventurer**.

U.S. Citizen. Worked in or traveled to **all 50 US states**, major Canadian provinces, Japan, Hong Kong, Australia, New Zealand, Sweden, France, Italy, Germany, Switzerland, UK, Israel.
