JetBloom - Principal DevOps Performance Evangelist

2014-

Implemented IoT clouds from **Amazon**, **Microsoft**, **Samsung**. Designed and socialized a **comprehensive approach** to **DevOps** which includes Nexus, Dynatrace. Coded **Bash**, Java JUnit, SikuliX Selenium with OpenCV & Tesseract, JavaScript to achieve shift-left development Performance Engineering by including GC, Dynatrace, and other APM metrics presented after Git-triggered runs in Jenkins CI/CD. Wrote and evangelized 85 Confluence and mark-down articles (from the ground up) for enterprise-level collaboration and training. Initiated Communities of Practice for developers. Consistently maintained daily stand-ups as part of **SAFe Agile**. Constructed **JAM-stack websites** leveraging **REST APIs**. Used Pivotal Tracker, Trello, JIRA, and other tools with daily SCRUM and velocity calculations.

Crafted and presented step-by-step hands-on **video-augmented** tutorials at conferences on **DevSecOps**, **Git**, Bash & PowerShell scripting, and performance. Created end-to-end DevOps pipelines for **IoT** using Jenkins2 Groovy, **Ansible**, **Packer**, **Terraform**, Docker in **Google Compute** and EC2 clouds. Defined proactive use of alerts and monitoring from AppDynamics, Google Analytics, and ELK-stack. Designed and coded Python scripts for AWS, data-handling, and use of **SciPy in an Algorithmia API**. Designed and programmed **OAuth2** and **JavaScript libraries**.

HP Software - Master Developer Advocate/Consultant

2010-2014

Introduced **Salesforce CRM**. Led teams in China, India, and New Zealand to reduce response time 85%. Assets from the effort are now included in SAP Mobile installers. Improved responsiveness of mobile conference app by 40% by tuning JVM and logging. For a service that performs like Google's PageSpeed in-house, established all aspects of evangelism, including architecture and development with vendors around the world. This includes creating **videos** and live presentations at meetups and technical deep-dives. Created demo environments in AWS & Syktap cloud for testing and hands-on courses (with videos).

MBO Partners SRE Performance/Developer

2007-2010

Led international teams to get several enterprise systems into production through debugging, **profiling**, and benchmarking Java and WebSphere. Implemented agile processes, code reviews, static code analysis, and automation. Reduced response time spikes and garbage collection by 62% on an app. Integrated third-party APIs, SQL, Java, and .NET C# code.

Prior experience

to 2007

Consulting experience with an international consultancy (KPMG). Six-sigma consultant. Obtained Top Secret clearance to design and program systems for the Stealth Fighter at Lockheed Skunk Works. Programmed apps using C, C#, Visual Basic, and declarative languages. Product Manager of international security product.

Education

M.S., Educational Computing, Pepperdine University

B.S., Economics, Loyola Marymount University

97 courses completed on LinuxAcademy, ACloud.guru, Coursera, EdX, Udacity, Lynda, Pluralsight, OpenSAP, **QwikLABs**. **Salesforce Trailhead Adventurer**.

U.S. Citizen. Worked in or traveled to **all 50 US states**, major Canadian provinces, Japan, Hong Kong, Australia, New Zealand, Sweden, France, Italy, Germany, Switzerland, UK, Israel. Owner of farm near Billings, Montana
