DevOps/Cloud Performance Leader at JetBloom

2014-

Led teams which achieved shift-left development Performance Engineering by automating **memory profiling** and metrics capture in Git-triggered jobs in **Jenkins automated cloud-based CI/CD**. Defined proactive use of monitoring and alerts from **Dynatrace**, AppDynamics, Google Analytics, Elastic (ELK) stack, **New Relic**. Designed a **perf engineering in the cloud** approach that saves money using functional and **security** test tools.

Designed roadmaps, timelines, velocity calculations, and process presentations to executives and technical audiences. Used Trello, JIRA, Skype, Zoom, and other collaboration tools. Consistently maintained SCRUM/stand-ups and KanBan as part of **SAFe Agile using CA Agile**. Initiated on-going Communities of Practice meetups among developers and operations. Collaborated in creating videos and **300+ deep-dive articles** written using mark-down for enterprise-level collaboration and training. Crafted and presented step-by-step hands-on **video-augmented** tutorials at conferences on **DevSecOps**, **Git**, **Shell scripting** (building pre-checks and verifications at each step).

Lead a team to create tools and tutorials to **restore/load data** using **Salesforce DX**.

Coded **SikuliX Selenium with OpenCV & Tesseract OCR**, JMeter Java, **LoadRunner C & JavaScript**, **Flood Element Typescript**. Constructed **JAM-stack websites** leveraging **APIs**. Created **DevOps** pipelines using **Ansible**, **Packer**, **Terraform**, **Docker** in **Google Compute** and **EC2** clouds. Implemented **IoT** in **Amazon**, **Microsoft Azure**, **Samsung**, and other clouds. Designed and coded Python for data-handling and use of **SciPy in an Algorithmia (Machine Learning) API**. Designed and programmed **OAuth2** and **JavaScript** libraries.

Master Developer Advocate/Consultant at HP Software

2010-2014

Introduced **Salesforce CRM**. Led teams in China, India, and New Zealand to reduce response time 85%. Assets from the effort are now included in SAP Mobile installers. Improved responsiveness of mobile conference app by 40% by tuning JVM and logging. Led introduction of Shunra mobile network analytics -- a service that performs like Google's PageSpeed in-house -- established all aspects of evangelism, including architecture and development with vendors around the world. This includes creating **videos** and live presentations at meetups and technical deep-dives. Created environments in AWS, Skytap, and other clouds for testing, automated demos, and hands-on courses (with videos).

SRE Performance/Developer with MBO Partners

2007-2010

Led international teams to get several enterprise systems into production scalability and stability through debugging, **profiling**, and benchmarking. Implemented and evangelized Agile processes, code reviews, static code analysis, and automation. Integrated third-party APIs, SQL, Java, and .NET C# code. Reduced response time spikes and garbage collection by 62% on an app.

Prior experience

to 2007

Managed up to 35 technologists. Consulting experience with an international consultancy (KPMG). Six-sigma consultant. Obtained Top Secret clearance to design and program systems for the Stealth Fighter at Lockheed Skunk Works. Programmed apps using C, C#, Visual Basic, and declarative languages.

Product Manager of international security product.

Education

M.S., Educational Computing, Pepperdine University

B.S., Economics, Loyola Marymount University

98 courses completed on LinuxAcademy, ACloud.guru, Coursera, EdX, Udacity, Lynda, Pluralsight, OpenSAP, **QwikLABs**. **Salesforce Trailhead Adventurer**.

U.S. Citizen. Worked in or traveled to **all 50 US states**, major Canadian provinces, Japan, Hong Kong, Australia, New Zealand, Sweden, France, Italy, Germany, Switzerland, UK, Israel.
